Continuation of Substance of Interview including description of the general nature of what was discussed: Agreed to renumber claims 11-20 as claims 63-72, respectively since original claims 11-62 had been canceled in the amendment filed on 7-5-06. Agreed to amend claims 3, 63, and 68 to specify the pH sensor as ascertaining the pH of the treated coal-bed-methane water so as to correspond with the disclosure on lines 14-17 of page 10 of the specification. Agreed to amend claim 6 to specify the flow sensor as measuring the flow rate into the reservoir in order to correspond with lines 12-14 of page 18 of the specification. Agreed to amend claims 63 and 68 to provide antecedence for the "water flow rate" and to specify the flow rate through the generator as being adjusted in order to correspond with the disclosure on lines 14-17 of page 10 of the specification. See the attached examiner's amendment and reasons for allowance for details.
